

SESSION (2025-26)
ANNUAL SYLLABUS
XI- ECONOMICS (030)

Part A Statistics for Economics

In this course, the learners are expected to acquire skills in collection, organisation and presentation of quantitative and qualitative information pertaining to various simple economic aspects systematically. It also intends to provide some basic statistical tools to analyse, and interpret any economic information and draw appropriate inferences. In this process, the learners are also expected to understand the behaviour of various economic data.

Unit 1: Introduction

What is Economics?

Meaning, scope, functions and importance of statistics in Economics

Unit 2:

Collection, Organisation and Presentation of data :

1. Collection of Data: Sources of data-primary and secondary, how basic data is collected with concept of Sampling, methods of collecting data, some important sources of secondary data, census of India and National Sample Survey Organization.

2. Organization of Data: Meaning and types of variables; Frequency Distribution.

Presentation of Data:

) Tabular Presentation and diagrammatic presentation of data:

i) Geometric forms(bar diagrams and pie diagrams)

(iii) Frequency diagrams (histogram, polygon and ogive) and

(iv) Arithmetic line graphs(time series graph).

Unit 3: Statistical Tools and Interpretation:

For all the numerical problems and solutions, the appropriate economic interpretation may be attempted. This means, the students need to solve the problems and provide interpretation for the results derived.

Measures of Central Tendency - Arithmetic mean

Part B: Introductory Microeconomics

Unit 4:

Introduction

Meaning of microeconomics and macroeconomics; positive and normative economics.

What is an economy? Central problems of an economy: what, how and for whom to produce; concepts of production possibility frontier and opportunity cost.

Unit 5:

Consumer's Equilibrium and Demand :

Consumer's Equilibrium - Meaning of utility, marginal utility, law of diminishing marginal utility, conditions of consumer's equilibrium using marginal utility analysis.

Indifference curve analysis of consumer's equilibrium-the consumer's budget (budget set and budget line), preferences of the consumer (indifference curve, indifference map) and conditions of consumer's equilibrium.

Demand, market demand, determinants of demand, demand schedule, demand curve and its slope, movement along and shifts in the demand curve;

Price elasticity of demand - factors affecting price elasticity of demand; measurement of price elasticity of demand – percentage-change method and total expenditure method.

Unit 6:**Producer Behaviour and Supply**

Meaning of Production Function - Short-Run and Long-Run

Total Product, Average Product and Marginal Product

Returns to a Factor

Mid Term Syllabus Must Be completed by 06th September 2025 Preparation For

Mid Term Examination

Mid Term Examination 2025-26

Discussion Of Mid Term Question Paper

Part A Statistics for Economics**Unit 3: Statistical Tools and Interpretation**

Measures of Central Tendency - Median and mode

Correlation – Meaning and properties, scatter diagram; Measures of correlation - Karl Pearson's method (two variables ungrouped data) Spearman's rank correlation (Non-Repeated Ranks and Repeated Ranks).

Introduction to Index Numbers - Meaning, types - Wholesale Price Index, Consumer Price Index and Index of Industrial Production, uses of index numbers; Inflation and Index Numbers, Simple Aggregative Method.

Part B: Introductory Microeconomics**Unit 6: Producer Behaviour and Supply**

Cost - Short run costs - total cost, total fixed cost, total variable cost; Average cost; Average fixed cost, average variable cost and marginal cost-meaning and their relationships.

Revenue - total, average and marginal revenue - meaning and their relationship. Producer's

equilibrium- meaning and its conditions in terms of marginal revenue - marginal cost. Supply, market supply, determinants of supply, supply schedule, supply curve and its slope, movements along and shifts in supply curve, Price elasticity of supply; measurement of price elasticity of supply - percentage-change method.

Unit 7:

Perfect Competition -Price Determination and simple applications:

Perfect competition - Features; Determination of market equilibrium and effects of shifts in demand and supply (short run only)

Simple Applications of Demand and Supply: Price ceiling, price floor.

Part C: Project in Economics

Suggestive List of Projects: Class XI

- Effect on PPC due to various government policies
- Invisible Hand (Adam Smith)
- Opportunity Cost as an Economic Tool (taking real life situations)
- Effect of Price Change on a Substitute Good (taking prices from real life visiting local market)
- Effect on Equilibrium Prices in Local Market (taking real life situation or recent news)
- Effect of Price Change on a Complementary Good (taking prices from real life visiting local market)
- Solar Energy, a Cost-Effective Comparison with Conventional Energy Sources
- Bumper Production- Boon or Bane for the Farmer
- Any other newspaper article and its evaluation on basis of economic principles
- Any other topic

Prescribed Books:

1. Statistics for Economics, NCERT
2. Introductory Microeconomics, NCERT

Syllabus must be completed by 31st January 2026
Annual examination will be based on whole syllabus
Annual Examination 2025-26.

For any other information kindly refer to CBSE guideline

<https://cbseacademic.nic.in>

ECONOMICS (Subject Code 030)
CLASS – XI (2025-26)

Theory: 80 Marks

3 Hours

Project: 20 Marks

Units	Marks
Part A Statistics for Economics	
Introduction	15
Collection, Organisation and Presentation of Data	25
Statistical Tools and Interpretation	40
Part B Introductory Microeconomics	
Introduction	04
Consumer's Equilibrium and Demand	14
Producer Behaviour and Supply	14
Forms of Market and Price Determination under perfect competition with simple applications	08
	40
Part C Project Work	20
